CRM

Customer–relationship management (CRM) is an approach to manage a **company's interaction** with current and potential customers. It uses data analysis about customers' history with a company to improve business relationships with customers, specifically focusing on customer retention and ultimately driving sales growth.

One important aspect of the CRM approach is the systems of CRM that compile data from a range of different communication channels, including a company's website, telephone, email, live chat, marketing materials and more recently, social media. Through the CRM approach and the systems used to facilitate it, businesses learn more about their **target audiences** and how to best cater to their needs.

WHAT ARE THE BENEFITS OF CRM?

INCREASED PRODUCTIVITY

EMPOWERED SALES MANAGEMENT

ENHANCED CONTACT MANAGEMENT

CROSS-TEAM COLLABORATION

INTEGRATED SALES FORECASTING

RELIABLE REPORTING

CLOUD COMPUTING

Cloud computing refers to the **delivery of computing services**, including servers, storage, databases, networking, software, and analytics, over the internet ("the cloud"). Unlike traditional on-premises infrastructure, cloud computing allows users to access these resources on-demand, paying only for what they use. It offers scalability, flexibility, and reliability, making it an indispensable tool for businesses and individuals in today's data-driven world.

KEY BENEFITS OF CLOUD COMPUTING

▶ **UNPARALLELED FLEXIBILITY**

▶ **COST OPTIMIZATION**

▶ **ENHANCED COLLABORATION**

▶ **GLOBAL ACCESSIBILITY**

TYPES OF CLOUD COMPUTING SERVICES

▶ **INFRASTRUCTURE AS A SERVICE**

▶ **PLATFORM AS A SERVICE**

▶ **SOFTWARE AS A SERVICE**

BLOCKCHAIN DEVELOPMENT

The applications of Blockchain, the underlying technology for cryptocurrencies, have now been extended to payments, identity management, insurance, healthcare, and digitization of physical assets. Techturbine team of Blockchain experts and domain specialists can help companies across industries implement **tailored DLT solutions**. We help you make peer-to-peer (P2P) transactions faster, more secure and transparent, thereby reducing fraud risk.

Blockchain IT solutions can boost the ROI of IoT-related investments for the oil & gas, retail, and manufacturing industries, as DLT helps address common scalability, privacy, and reliability concerns. By partnering with Techturbine you can drive enterprise-wide Blockchain initiatives with ease. We can help you accelerate the time to market for such projects through rapid prototyping, an agile development approach, and by leveraging our strategic partnerships with leading enterprises and academic institutions.
